Summary

I am an experienced software developer with 3+ years of work-on-hand experience and a history of working with trending technologies such as:

1. Front End: React and Redux, Node, and Express,vuejs.
2. Backend: Laravel,Node,Java.
3. Source Control: Git + Github
4. Cloud Application: Heroku, Firebase
5. Databases: MongoDB, Postgres, MySql
6. Languages: Javascript, Java, Python,php
7.DataStructures + OOP + CRUD + Algorithms.

I love working with talented folks tackling the next generation's problems.

Experience

Senior Software Engineer
Idealiner
Jul 2022 - Present (8 months)
I worked as a full-stack software developer on a music platform for independent artists to share their products

This has helped not only improve my technical skills but also improve other skills like communication, being proactive, etc

Software Developer
Imperium Ltd.
Apr 2020 - Feb 2021 (11 months)
Joining one of the best dev groups in Rwanda skyrocketed my experience as a developer we cool projects that attracted both the attention of their user and the media

during my time on Imperium I was in charge of these tasks:
1. Converting design from Figma to live apps using React
2. Coding app backend using NodeJs and express
3. reviewing code and ensuring clean pull requests
4. Supporting on the different tasks that would come from the clients

I was here I changed from coding Java to coding javascript

tapbits
TAP BITS

Mar 2018 - Feb 2019 (1 year)

I worked on java and got familiar with frameworks like swing and JavaFX by solving day to day problems around me I build several projects in java and visual Basic such as

1. Library management platform
2. Restaurant management platform
3. Music streaming platforms

I worked with like-minded folks to make projects that solved problems that were bugging both our school and our community.

Education

Holberton School
